9000 Series Motorized Hose Reel - 33' of 4" Series 7750 (750 degree F) Hose - 4 Button Pendulum Controls - Automatic Damper - TCA Adapter - Qty. 10

#### Summary:

Monoxivent provided the Washington Metropolitan Area Transit Authority (WMATA) vehicle exhaust reels for the Andrews Federal Bus Operations and Maintenance Facility.

The 335,000 s.f. facility was constructed to have a 175 bus capacity Maintenance and Operations Facility, Fuel and Wash Buildings, a Heavy Repair and Overhaul (HR&O) Facility, a Warehouse, Bus Engineering and a Non Revenue Vehicle Maintenance Facility.

The project included a quantity of 69 - 8 inch diameter hose reels for bus repair and 10 - 4 inch diameter hose reels for vehicle maintenance.

The project general contractor was Hensel Phelps and the mechanical contractor was Shapiro & Duncan, Inc. The overall project expenditure is 132 million.

This was the 2nd project Monoxivent completed with WMATA, in 2012 we supplied the Shepherd Parkway facility with 34 hose reels.

H&B Products helped secure the project for Monoxivent boosting them to the top sales rep for the 2017 year.

This project was unique in that the large quantity of hose reels that were required. As well as the project falling under the Buy America Act.
