

## Application Spotlight

### 19 Reels Installed at Columbus Schools

#### Application Spotlight Location:

Columbus Ohio Schools  
Fort Hayes Campus  
Construction Arts and Auto Technology Building

#### Monoxivent Sales Rep:

Air Control Products  
Mike Hoffa

Air Control Products, Inc., an authorized Monoxivent representative received the opportunity to outfit a new centrally located construction arts and auto-technology building with vehicle exhaust removal equipment. The center is a part of the Columbus (OH) City School District. The installation consists of 19 Series 9000 spring loaded hose reels with direct mount D Series fans. Each reel has 33' of 6" diameter hose, a mechanical damper, an on/off micro-switch, tailpipe adapter, and noise silencer. In addition, three fume extraction arms and seven FDS-SA-CO carbon monoxide detectors were installed on the project.
