XL Oversized Hose Reels Installed at Fort Lee

Application Spotlight Location:

Fort Lee
Virginia

Monoxivent Sales Rep:

Shultz & James

Monoxivent has produced 82 [XL oversized exhaust hose reels](#) for Ft. Lee (Virginia). The reels are used to provide a **clean air environment for the US Military** in a maintenance facility for oversized military vehicles. The reels are offered with 24" and 36" diameter drums and are between 3' and 7' in width. The largest reel holds 60' of 18" diameter high-temperature exhausting hose.

In addition to the XL Reels, Monoxivent produced five **insulated high-temperature exhaust stack bases for M1 tank fume source capture**.
