Application Spotlight Location:

McGrath Hawkeye Harley-Davidson
Coralville, IA

Monoxivent Sales Rep:

Rist and Associates
Brian Vande Venter

Details:

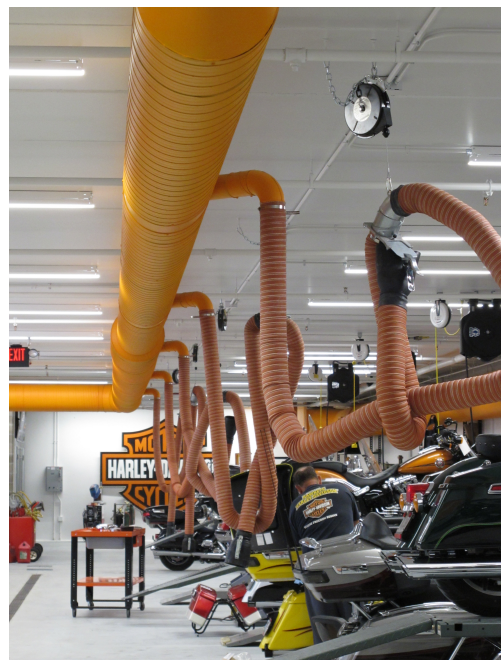

(6) 11000-Series Retractable Overhead Exhaust Systems, 23800 Series Adapters with Y-Kits

Summary:

Monoxivent provided a complete source capture solution for exhaust removal in Hawkeye Harley-Davidson's Service Department. The 11000- Series connects to the motorcycle exhaust pipes to provide a clean air environment for the technicians inside the facility.

Monoxivent worked closely with installing contractor Modern Sheet Metal. "It was important that the fan system be sized correctly to accommodate the current needs, and future needs. The installation went smoothly and only took a couple of days," says Project Manager Mike Peiffer, Modern Sheet Metal.

Monoxivent's conventional overhead systems are user-friendly and cost-effective solutions that meet a wide variety of demands. The Hawkeye system incorporated 4000 Series high temperature silicone hose, however other hose types are available. The six hose systems connect to a single exhaust fan to complete the package.
