Sandusky County Maintenance Facility, Vehicle Exhaust Removal

Application Spotlight Location:

Sandusky County Maintenance Facility
Sandusky Co., OH

Monoxivent Sales Rep:

Air Control Products
(Joe Chamigo & Jeff Dubecky)
Broadview, OH

Air Control Products provided four source capture systems for the Sandusky County Maintenance Facility in NW Ohio. The job, installed by Wheeler Sheet Metal, includes pull-up kits with 24' of high-temperature, 6" diameter, 4000 Series hose. A stainless steel tapered cone adapter (TCA-6) is used to connect to the exhaust pipes.

County maintenance trucks are connected to the hose drops to provide clear air and to address indoor air quality in the shop's work environment.

The County has been please with the user-friendly systems.
